

Practice ACT #6 - Diagnostic Sheet

The diagnostic sheet lists the topic of each question on Practice ACT #6.

One of the best ways to prepare for test day is to complete a practice ACT. **After you complete the practice ACT, use the diagnostic sheet below to identify what concepts and chapters you need to complete.** The diagnostic sheet lists the topic and corresponding chapter for all questions on the practice test for the English and Math sections. For Reading and Science, the diagnostic sheet lists the question type for each question.

***Important note: One practice ACT is not enough to fully diagnose all your weaknesses. Completing any topics/chapters the correspond with the questions you answered incorrectly on this practice ACT is a great place to start, but you should not stop there.** A single practice ACT does not include all topics tested on the ACT. To be fully prepared for test day, you should complete 4-6 practice ACTs and all the content included in the study guide you select for the Ultimate ACT Course.
